## Datasheet

### Matrax I-Gear 1000

Lubricating oils obtained from paraffinic mineral, adequate to satisfy the needs of general lubrication of all types of machinery. Its high

resistance to aging, noticeable oiliness and anti-rust power, allow to avoid the metal surfaces of the privation of the lubricant protection, thereby

reducing wear on the machines. This excellent lubricant power also reduces the coefficient of friction under conditions of thin film lubrication.

#### Typical characteristics

Viscosity at 40°C	ASTM D 445	1000,0 cSt	Flash point	ASTM D 92	290 °C
Viscosity Index	ASTM D 2270	95 mín.	Pour point	ASTM D 97	-15 °C
Density at 15°C	ASTM D 1298	0,893 g/cc			

#### Health & Safety

The product is not classified as hazardous. For more information refer to the Material Safety Data Sheet (MSDS).
